

APÊNDICE

ATLAS DAS MACRO E MICROFOTOGRAFIAS DAS SECÇÕES TRANSVERSAIS E TANGEN- CIAIS DAS ESPÉCIES ESTUDADAS.

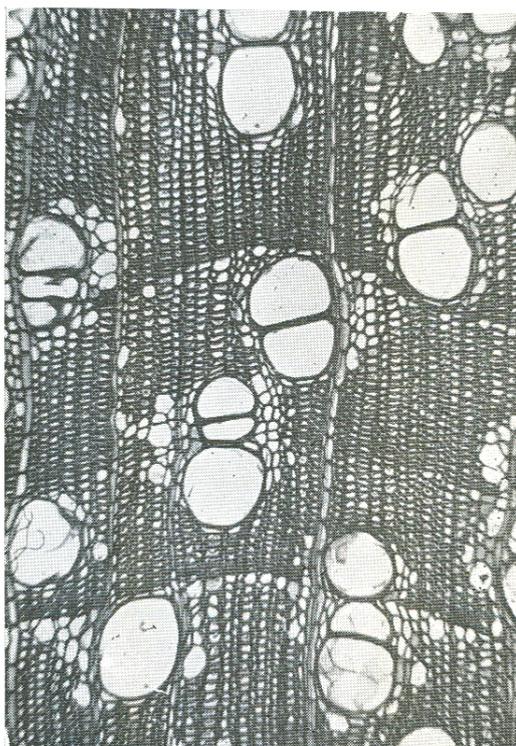

As macrofotografias com 10 X, foram obtidas diretamente das superfícies de topo do corpo de prova, preparados convenientemente em micrótomo Jung. R. Jungag, fotografados com microscópio estereoscópio Olympus SZ.

As microfotografias com 50 X, foram adquiridas diretamente das lâminas histológicas com microscópio Olympus Trinocular FH, câmara Olympus.

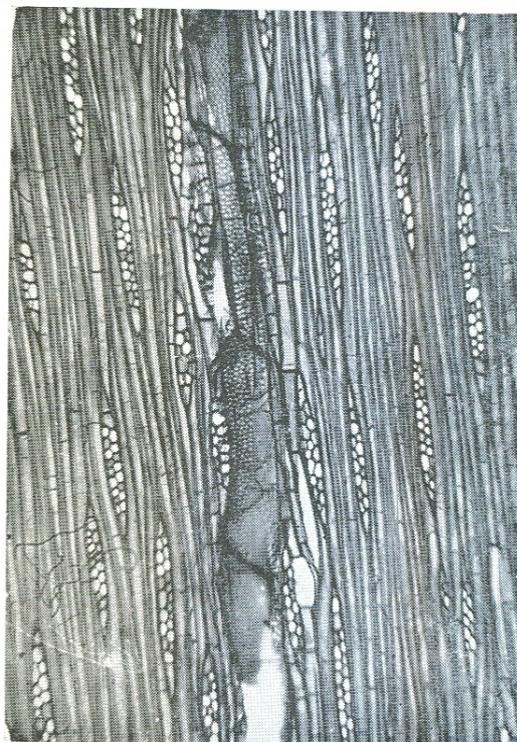

As fotos são dispostas segundo a ordem da organização por espécie.

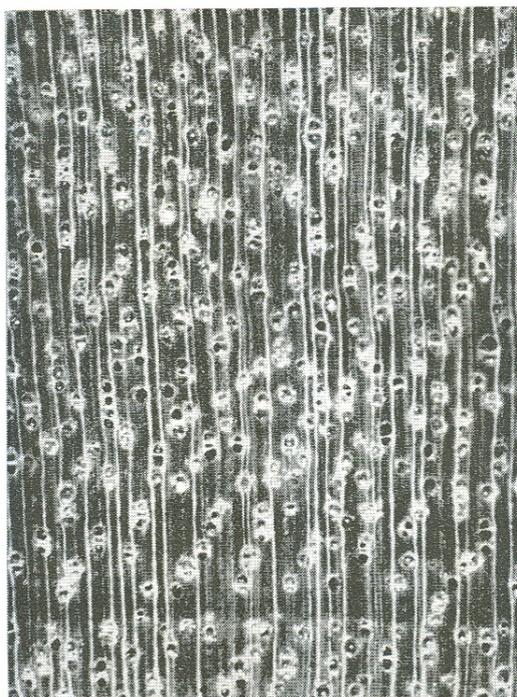

A — Secção transversal (10X)

B -- Secção transversal (50X)

C — Secção tangencial (50X)
